

Dialectic Video Analysis

EXQUIRE
Expect the unexpected

Video recordings can provide a real-time, eyewitness account of a crime so as investigators can watch, what transpired at the scene. Forensic Experts have many techniques to enhance recordings that can bring out details and provide a clearer picture of what occurred.

- **Incident Search**
- **Scene Synopsis**
- **Audit Compliance**
- **Investigation & Analysis**
- **Evidence Management**

Rapid Investigation and Evidence analysis helps investigators, and other law enforcement personnel to conduct their duties, in more efficient and faster means. **EXQUIRE™** offers tools and methodologies that provide empirical evidence for the challenging qualities of the video to address the situation immediately and during investigations.

EXQUIRE™ allows to effectively search in videos recorded in any system, empowers investigation and analysis from recorded footage from any external sources, and use state-of-the-art tools to search through them - Faster analysis and auditing of recorded video.

Incident : Color, Size, Person, etc.

Scenario : Events & Episodes

Evidence : Enhanced Extraction

Time is the essence, in investigation and gaining insights. **EXQUIRE™** offers effective tools, that can be used at surveillance and security deployments as add-on to existing systems, to improve operational efficiency by effectively investigating incidents and disputes arising at the premises at the earliest possible time.
